Effective Date

PRECAUTIONARY BOIL ORDER ADVISORY

Affected Area in Precautionary Boil Order

Address/Street	
Address/Street	
Address/Street	

The water system required repairs today, and it was necessary to shut down the water main to make the repairs. The Utility Division has submitted a water sample for Bacteriological testing and is waiting for confirmation that the water quality in this area is safe for drinking.

This **Precautionary Boil Advisory** will remain in effect until bacteria tests are complete. This process can take between 24-48 hours. Customers affected by the outage should boil the water for at least FIVE (5) minutes before using it for cooking, drinking, food preparation, washing dishes, or brushing teeth.

If our certified laboratory requires additional tests, Village personnel will notify you of the boil advisory extension. We understand this is an inconvenience, but ensuring clean, safe drinking water for utility users is essential. Thank you in advance for your cooperation, understanding, and patience during this time.

If you have any questions or concerns, please contact our Water & Sewer Superintendent, Tom Kopanski, at (331)212-9042 or by email at tkopanski@montgomeryil.org.

A copy of this notice is available online in English and Spanish.
